Investment objective 投資目標

The investment objective is "long-term total return to be achieved by investing at least two-thirds of the Fund's assets in Debt and Debt-Related Securities issued by governments, supranational institutions or government-related bodies that are domiciled in Asian countries; and/or, Debt and Debt-Related Securities issued by companies that have their registered office in an Asian country; and/or, issued by companies which have the preponderance of their business activities in an Asian country; and/or, issued by holding companies that have the preponderance of their assets in companies with their registered office in an Asian country. The Fund may also invest in Debt and Debt-Related Securities of corporations or supra-national institutions which Debt and Debt-Related Securities are denominated in Asian currencies and other Transferable Securities issued by governments or government-related bodies that are domiciled in Asian countries. Such securities may include, but are not limited to convertibles, floating rate securities, asset-backed securities, perpetual securities, preferred stocks and warrants up to an absolute maximum of 25% of the Fund. The Fund may utilise techniques and instruments for hedging and/or investment purposes, efficient portfolio management and/or to manage foreign exchange risks, subject to the conditions and within the limits laid down by the CSSF. In general, these techniques and instruments include, but are not limited to, securities lending and reverse repurchase transactions (as described in Appendix A of the Summary Prospectus) and forward foreign currency contracts. Without limiting the generality of the foregoing, the Investment Adviser may alter the currency exposure of the Fund, solely through the use of derivative contracts (without buying or selling underlying Transferable Securities or currencies). Performance may be strongly influenced by movements in currency rates because the Fund may have exposure to a particular currency that is different to the value of the securities denominated in that currency held by the Fund. Furthermore, the Fund's portfolio may be fully or partially hedged back to the Base Currency if, in the opinion of the Investment Adviser, this is believed to be appropriate. Regulations in the markets in which the Fund invests may require or limit hedging or other use of financial derivative instruments, either explicitly or as a result of the Investment Adviser managing resultant risk. The base currency of the Fund is US Dollars".

On 1 March 2006, Aberdeen Global - Australasian Bond Fund has changed its name and mandate to become Aberdeen Global - Asia Pacific & Australasian Bond Fund. Fund manager's report 基金評論

- Sentiment generally improved during June, but remained fragile. Although the evidence to date suggests that the negative impact from the European region's fiscal problems on the Asian region appear limited, fears of a double-dip in global activity have kept markets on a cautious footing. While economic momentum in Asia is moderating, the regions outcomes will likely remain relatively resilient.
- Within Asia, the Hong Kong and Singapore dollar bond markets took their lead from US treasuries with 10 year yields falling by approximately 0.2% and 0.4% respectively, while the best performing bond market was once again the Indonesian market. The move toward a gradual normalization of monetary policy continued with the Taiwanese central bank surprising, by raising the discount rate by 0.125%.
- During the month, Chinese policymakers announced that they would recommit to reform of the CNY exchange rate regime and enhance exchange rate flexibility. Asian currencies had a mixed month, with the Indonesian rupiah and Malaysian ringgit strengthening against the US dollar on improved capital flows, while the Korean won weakened by 1.6% as the market feared the imposition of capital controls.
- 整體氣氛於6月份好轉,但依然脆弱。雖然至今證據顯示歐洲的財政問題對亞洲的打擊似乎有限,但全球陷入雙底衰退的恐慌令投資者維持審慎。雖然亞洲經濟動力正在減慢,但區內前景依然相對強勁。
- 於亞洲區內,港元及新元債券市場跟隨美國國庫債券的利好勢頭,10年期收益率分別下跌0.2%及0.4%,印尼則聯聯表現最佳佳市。各國政府繼續循序漸進正常化貨幣政策,例如台灣央行突然上調折讓率0.125%。
- 月內,中國政府承諾恢復改革人民幣匯率機制,同時增加匯率彈性。亞洲貨幣於6月份好淡爭持,印尼盾及馬來西亞零吉受到資金流量回升所支持,兌美元匯價上升,韓國則受到實行資本控制的憂慮所打擊,匯價下跌1.6%。

Disclaimer 免責聲明

This is not an offer to sell any investment funds referred to herein. In particular, such funds are not offered or sold in the United States or to US persons.

Investment involves risk. Before making any investment decision to invest in the fund, investors should read the Summary Prospectus and in particular to the investment policies and the risk factors. Investors should ensure they fully understand the risks associated with the fund and should also consider their own investment objective and risk tolerance level. Investors are reminded that they are responsible for their investment decision and they should not invest unless the intermediary who offers or sells the fund to them has advised them that the fund is suitable for them and has explained why, including how buying the fund is consistent with their investment objectives. If in doubt, please seek independent financial and professional advice.

Subscriptions may only be made on the basis of the relevant offering documents, the most recent annual financial statements and semi-annual financial statements if published thereafter. Investors are reminded that the value and income (if any) from shares of the fund may be volatile and could change substantially within a short period of time, and investors may not get back the amount they have invested in the fund. Past performance is not a guide to future performance. The investment returns are denominated in the base currency of the fund. US / HK dollar based investors are therefore exposed to fluctuations in the US dollar / HK dollar / base currency exchange rate.

Investors should note that emerging markets tend to be less liquid and more volatile than mature markets and the value of your investment could move sharply up or down. In some circumstances, the underlying investments may become illiquid which may constrain the Investment Manager's ability to realise some or all of the portfolio. The registration and settlement arrangements in emerging markets may be less developed than in more mature markets so the operational risks of investing are higher. Emerging markets may have relatively unstable government and may be more susceptible to adverse economic conditions which expose investors to higher levels of risks and political risks.

Investors should note that investment in bonds and other debt instruments are exposed to the credit risks of the issuer and interest rate risk. In the event that any issuer of bonds or other debt instruments experiences financial or economic difficulties, the value of the investment may be adversely affected (inability of the issuer to pay the interest on a bond and/or return the capital on redemption date) and may become zero. Interest rate fluctuations affect the capital value of investments. Where long term interest rates rise, the capital value of shares is likely to fall and vice versa. In addition, unlike income from a single bond, the level of income from a fund is not fixed and may fluctuate. Yields are estimated figures and may fluctuate.

A fund which focuses on investing in a geographical area or country is likely to be more volatile and may be more susceptible to fluctuations in value resulting from adverse conditions in the geographical area or country in which a fund invests.

Investors should note that the fund may enter into financial derivative instruments for the purposes of investment, hedging or efficient portfolio management and may therefore involve risks different from, or possibly greater than, the risks associated with investing in more traditional instruments such as equities or bonds.

Investors are reminded to consider the risks associated with the fund, in particular risks associated with financial derivative instruments as set out in the Summary Prospectus before investing in the fund.

本文並非出售本文件所載任何投資基金的一項邀約。特別是,該等基金並不在美國或向美國人士發售或出售。

投資涉及風險,投資者在作出投資於任何基金的決定之前,應詳閱招股說明書摘要,尤其是投資政策及風險因素。投資者應確保其完全理解基金所附帶的風險,並應考慮其自身的投資目標及可承受的風險水平。謹提醒投資者,其須對其所作出的投資決定負責。同時,除非向其推介或出售基金投資的中介人已向其提出有關基金乃適合其意見,並已向其闡明理由,包括買入有關基金將如何與其投資目標一致,否則其不應作出投資。如有疑問,請尋求獨立財務及專業意見。

認購將只按照有關銷售文件、最近的年度財務報表及半年度財務報表(如在年度財務報表之後發布)進行。茲提醒投資者,基金股份的價值及來自基金股份的收益(如有)可能有波動性及會在短時間內大幅波動,以及投資者可能無法取回所投資的款項。過往表現並非日後表現的指標。投資回報乃以基金的基本貨幣計值。因此,以美元/港元為基礎的投資者須承受美元/港元/基本貨幣匯率的波動。

投資者應注意,相比成熟市場,新興市場傾向流動性較低,波動性較大,而其投資價值可能急劇上升或下跌。在某些情況下,相關投資可能出現流動性不足,從而限制投資經理將部份或全部投資組合變現的能力。相比較成熟市場,新興市場的註冊及結算安排可能較不完善,故此投資管理風險較高。新興市場的政府相對來說較不穩定,亦較容易受到不利經濟狀況的影響,使投資者承受較高的風險水平及政治風險。

投資者應注意,債券及其他債務工具的投資涉及發行人的信貸風險及利率風險。倘若債券或其他債務工具的任何發行人出現財務或經濟困難,投資價值可能會受到不利影響(發行人可能無法支付債券的利息及/或贖回日退還資本)及可能變成零。利率波動影響投資的資本價值。如長期利率上升,股份的資本價值可能下跌,反之亦然。此外,跟單一債券的收益不同,來自基金的收益水平並不固定及可能波動。收益率乃為估計數字並可能波動。

專注投資於某地區或國家的基金可能較為波動,以及其價值可能較容易受到所投資地區或國家的不利狀況的影響而波動。

投資者應注意,基金可為投資、對沖或有效管理投資組合之目的而引用金融衍生工具,故此涉及的風險可能與投資於較傳統投資工具(如股票或債券)的風險不同,或可能較大。

茲提醒投資者,在作基金投資之前應考慮基金所附帶的風險,特別是招股說明書摘要所載的與金融衍生工具相關的風險。
